

Sydney - Abduction and kidnapping

Sydney Abduction and kidnapping

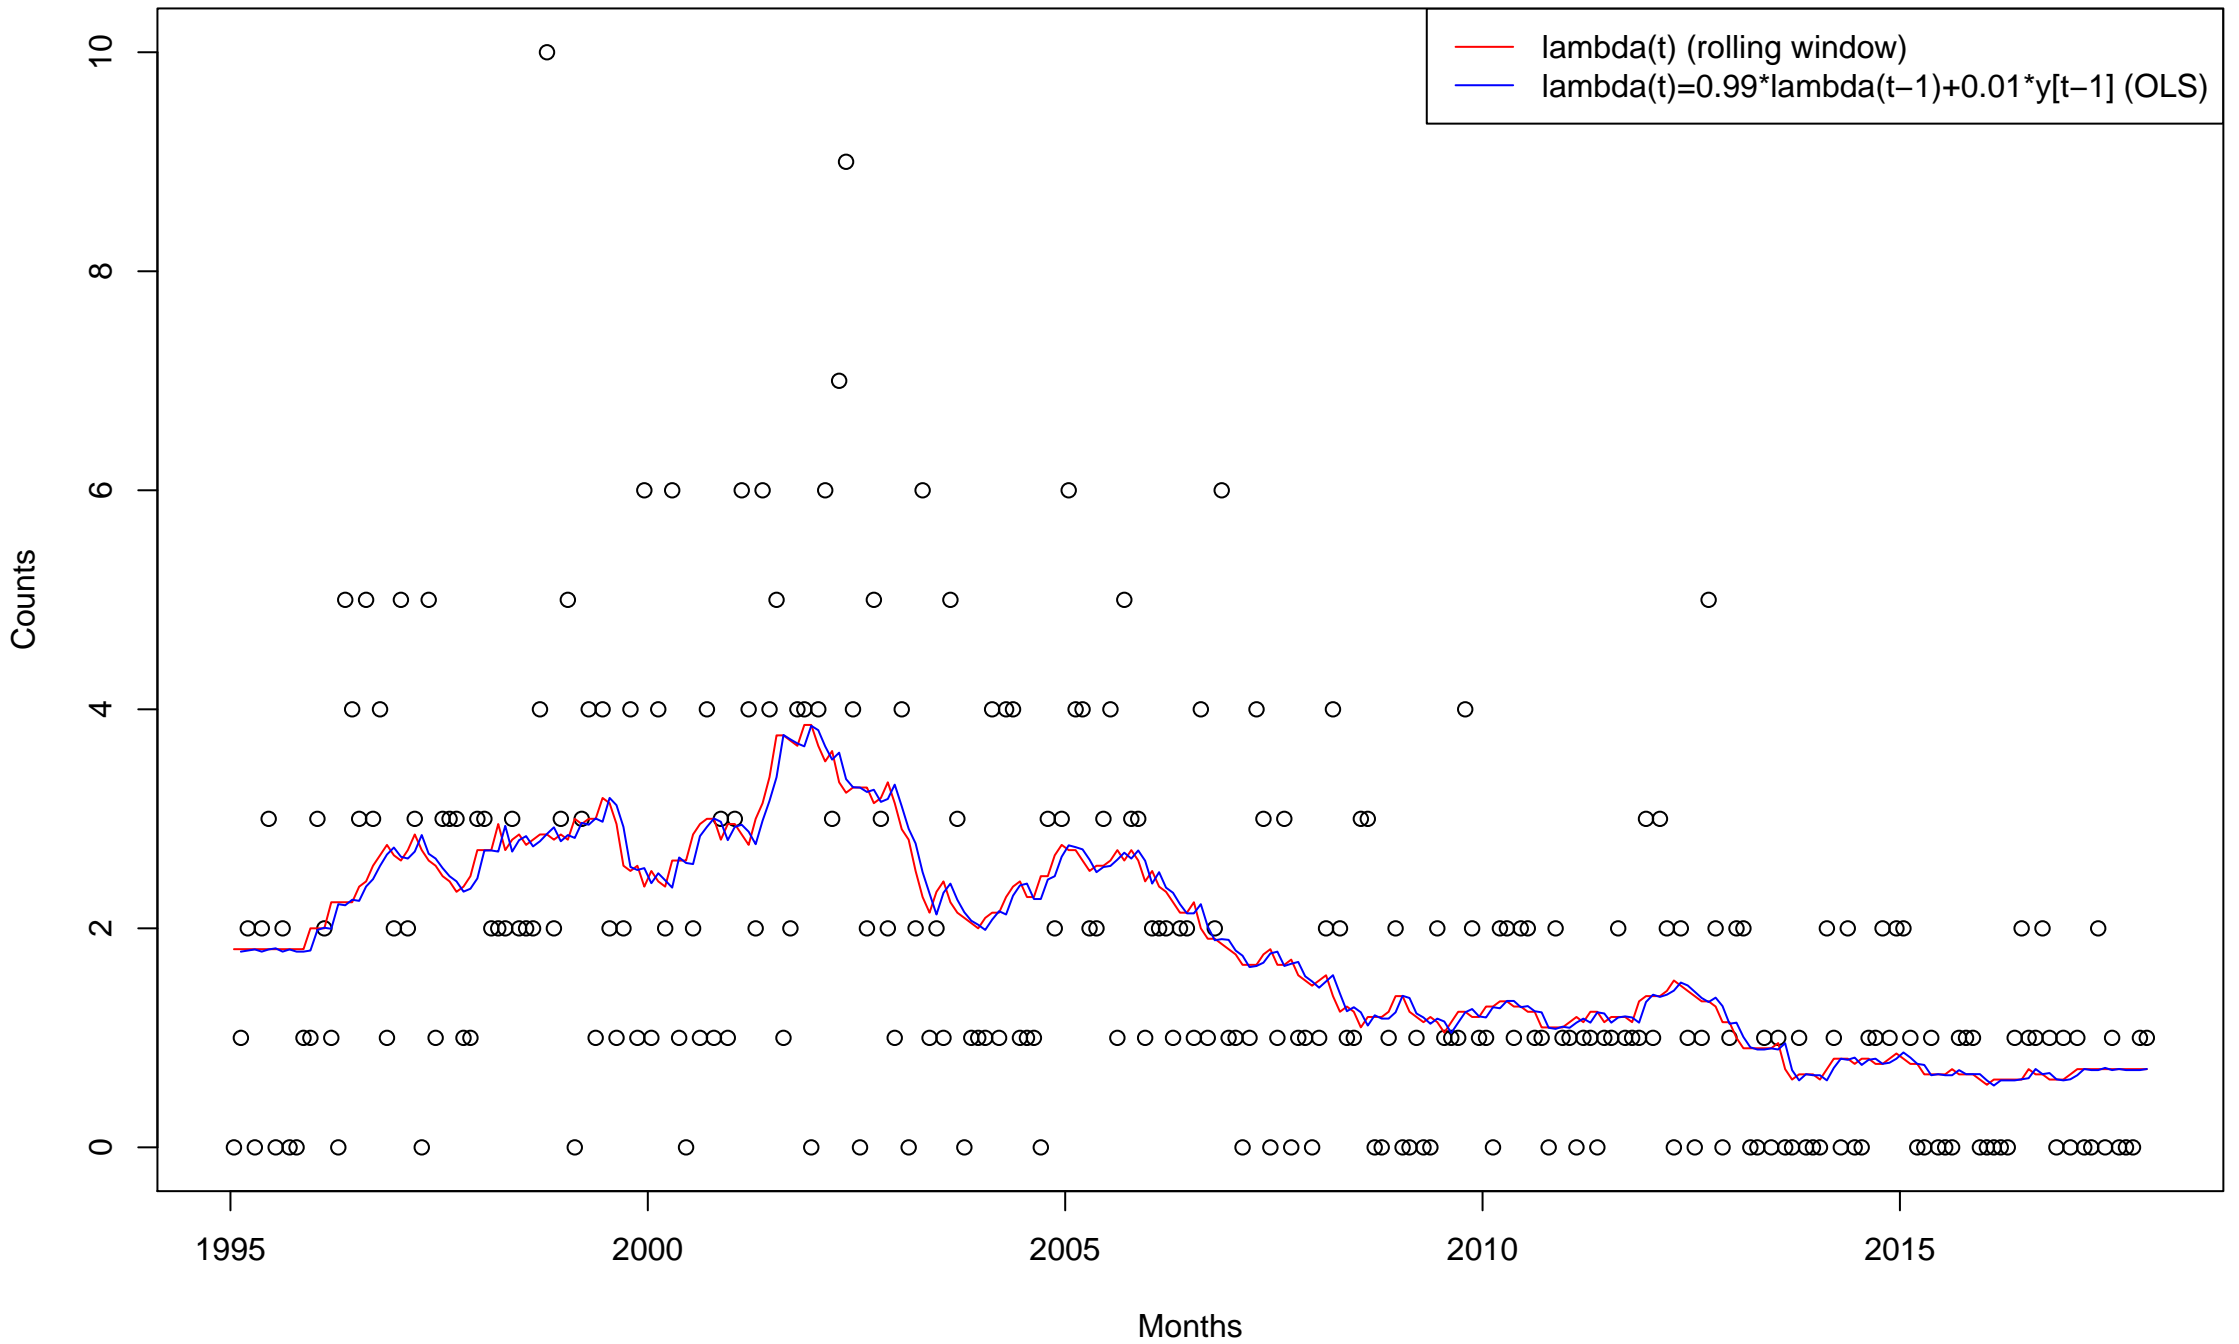

y_1, \dots, y_n iid Poisson(λ)
 $\lambda \sim \text{Gamma}(\alpha_0, \beta_0)$

$y(t) \sim \text{Poisson}(\lambda(t))$
 $\lambda(t) = \alpha \cdot \lambda(t-1) + \beta \cdot y(t-1)$

Likelihood function

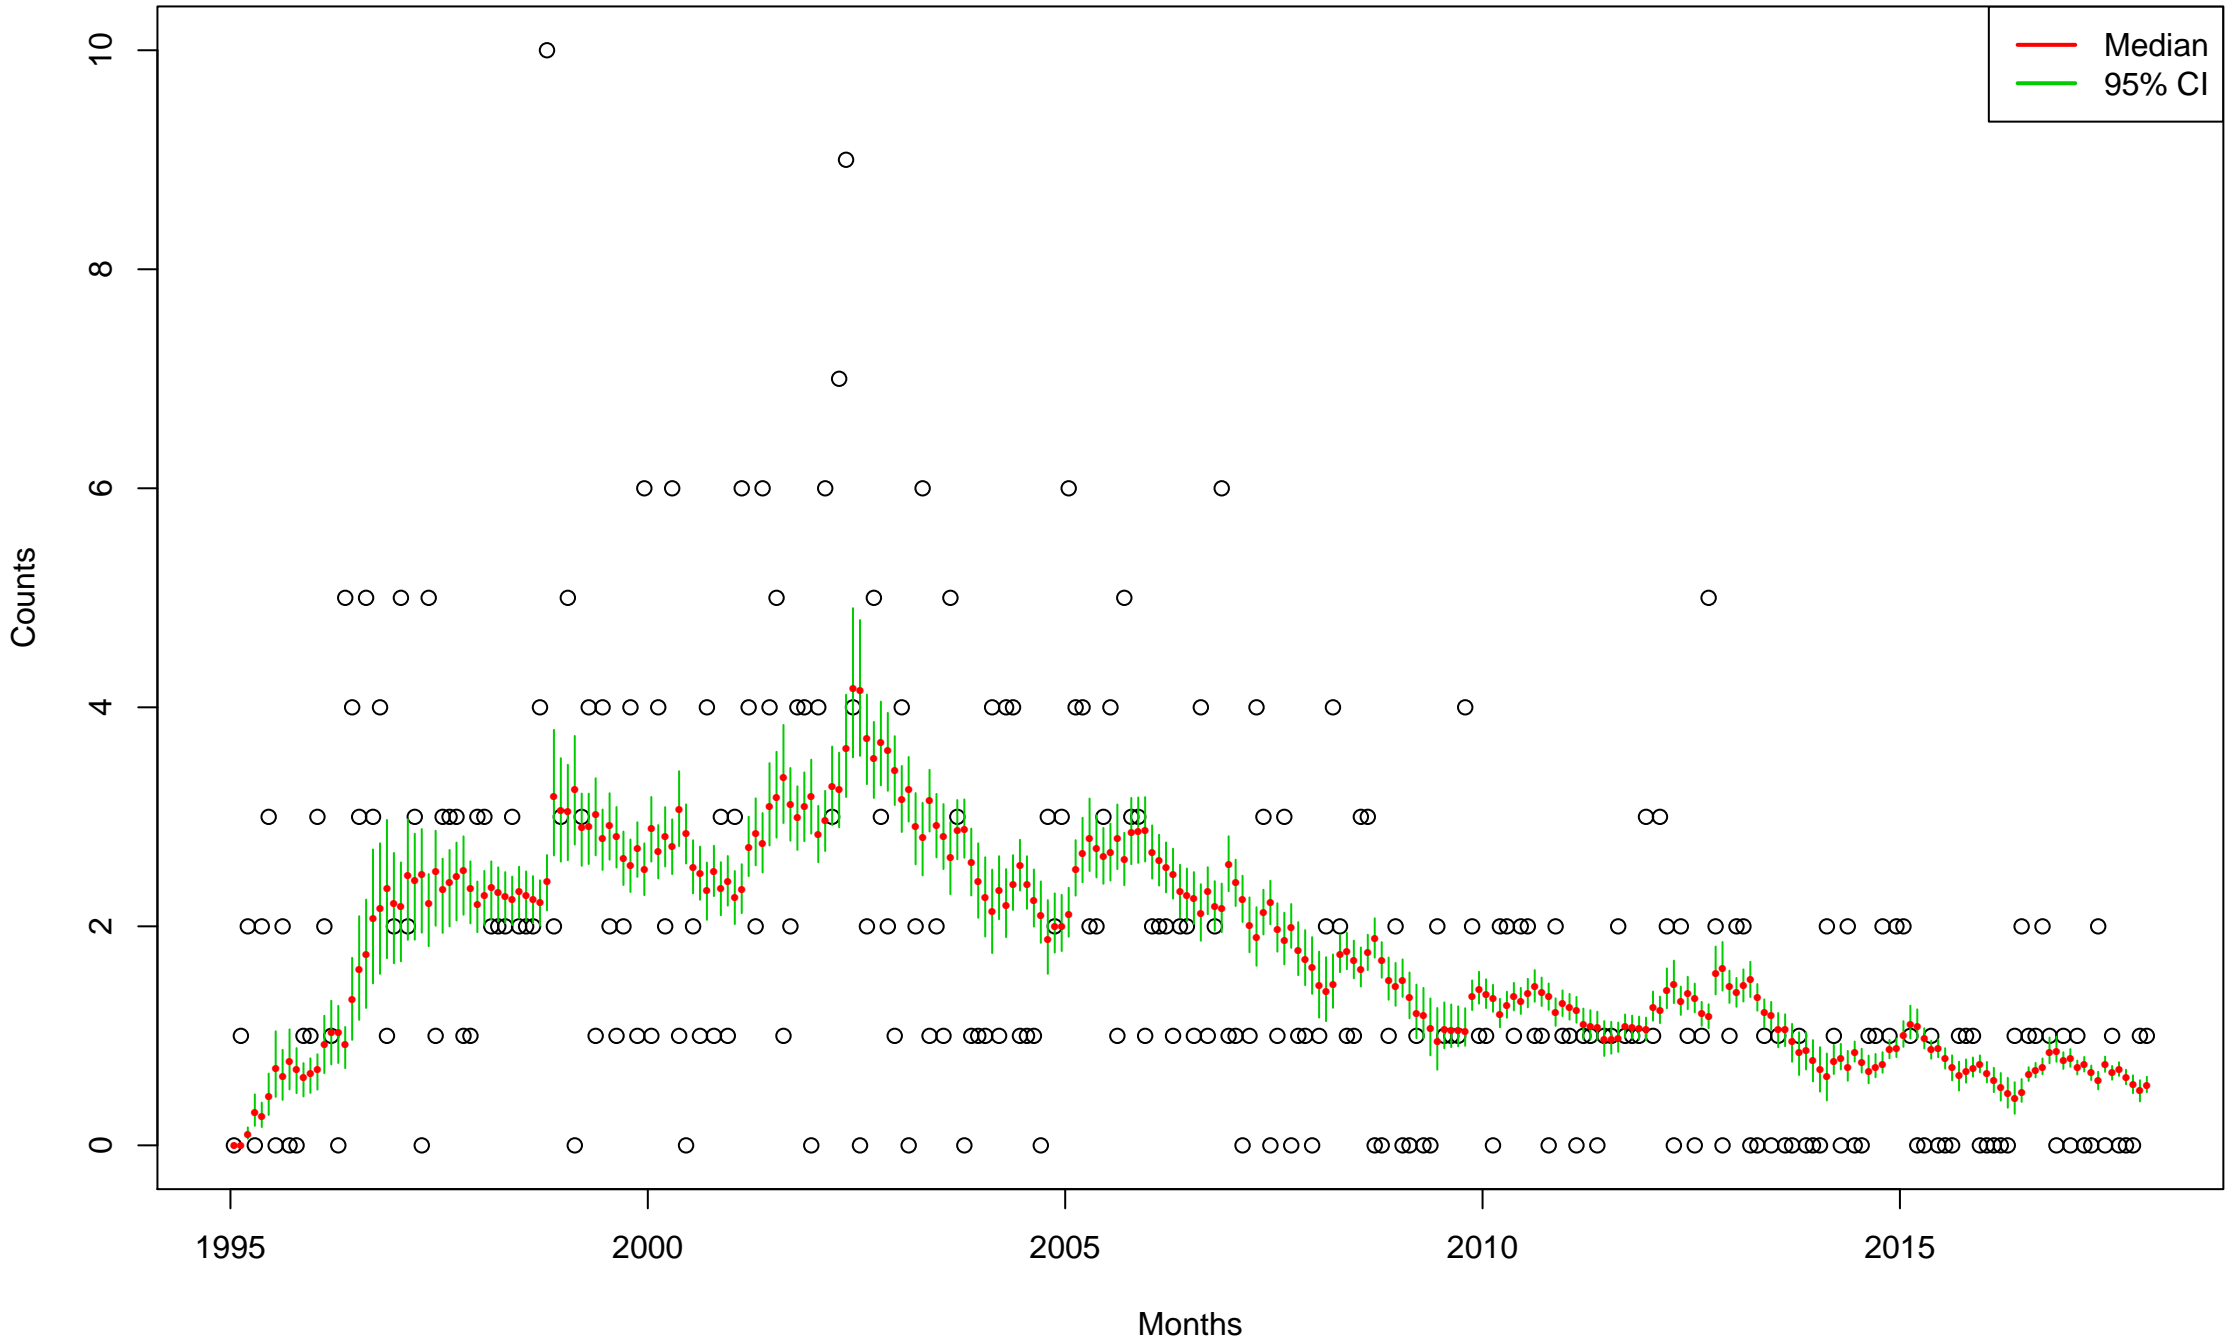

SIR based on 100,000 draws from $U(0.8,1.0) \times U(0,0.2)$
10,000 resampled draws

Posterior quantiles of lambda(t)

Posterior quantiles of $y(t)$
